

desired content if a stored designation of a work of authorship matches the designation of a work of authorship in the at least one broadcast station.

53. (New) The device of claim 52, further comprising a recording media for recording the user desired work of authorship in real time as it is provided over the global communication network.

54. (New) The device of claim 52, wherein the global communication network is a satellite radio network.

55. (New) The device of claim 54, further comprising a recording media for recording the user desired work of authorship in real time as it is provided over the global communication network.

56. (New) The device of claim 55, wherein the recording media includes a hard drive, and/or a floppy drive, and/or an optical drive.

57. (New) The device of claim 56, wherein the user desired work of authorship is recorded in an MPEG or .WAV format.

58. (New) The device of claim 54, wherein the work of authorship is selected from a group comprising songs, books, movies, movie shorts, educational works, and sports events.

59. (New) The device of claim 54, wherein the designation of a work of authorship is selected from a group comprising titles, segments of titles, key phrases and key words.

60. (New) The device of claim 54, wherein the user interface comprises a device for a user to selectively store a user designation of a work of authorship in a memory by saving the selectively decoded station broadcast as the selectively decoded station broadcast is received at the receiver.

REMARKS

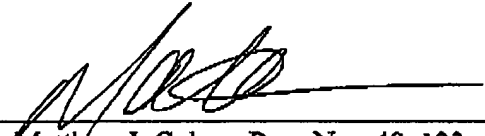

By way of this Preliminary Amendment, claims 1 to 40 have been cancelled. Accordingly, claims 41 to 60 are pending in the instant application. Applicants respectfully submit that the claims are fully supported in the specification as filed. No new matter has been added.

Favorable examination of the claims is hereby requested.

Respectfully submitted,
